EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claims 8-14, directed to a non-elected invention, have been cancelled.

REASONS FOR ALLOWANCE

2. Claims 1-7 and 15-20 are allowed.

3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of claims 1-7 and 15-20 are the limitations found in claims 1 and 15 for a sector drive unit with a second actuator to hold blades in both a closed position and an open position. The prior art teaches shutter mechanisms that include a retaining unit to hold the blades in a closed position for shock protection or in an open position for timing control of the shutter, but does not teach where a single actuator drives the retaining unit in combination with a motor used to drive the blades to both open and close the aperture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Singer (US 3,362,311), Richter et al. (US 3,504,611) and Dietz (US 3,701,310) teach shutters where a locking member is used to hold the blades in an open or closed position.
